PROJECTS

INTRODUCTION TO DATA SCIENCE COURSE PROJECT

Feb 2017 - Jun 2017 | Istanbul, Turkey

In this project, I have analyzed the effects of education in macro scale, and the factors affecting education in micro scale. For this purpose, I have constructed different machine learning models (linear regression, decision tree, logistic regression, SVM) using Python and several machine learning libraries (pandas, numpy, scikit-learn).

You can learn more about the projects above or more on my GitHub page.
